

EPISODE 5 TOWARDS NET ZERO GREEN BUILDINGS

Countries and businesses alike are setting bold targets to reduce emissions by 2030 to address the monumental devastation that would be brought about by climate change if we continue in the business-as-usual trajectory.

Listen to our line-up of expert panellist discuss what does net zero carbon goals mean for Malaysia's Real Estate Industry. During this webinar, we will address areas such as, What does the real estate & construction industry need to address to meet the targets? What are the biggest challenges for the industry? How regulations need to change to meet the targets? and much more.
