

**Applicable to all Toolkits**

To clarify GreenRE credit claims in line with requirements for rainwater harvesting tanks as per **UBBL amendments in 2011** and waste separation at source pursuant to regulations under **Solid Waste and Public Cleansing Management Act 2007 (Act 672)**, the following guidance applies:

*Rainwater Harvesting Tank Provision*

- Rainwater harvesting tank to be sized in accordance to Guidelines for Rainwater Harvesting and Utilization System (SPAH) and MSMA guidelines. The rainwater tanks are to be optimally sized to cater for outdoor water use only.
- Summary calculation for % replacement of estimated annual outdoor water requirements from rainwater harvesting tank to be provided as part of claim for this credit.

*Separation of Waste*

- For commercial buildings, waste separation bins to be provided at each floor in a convenient location and a suitable strategy should be available to manage the waste collection centrally.
- For high-rise residential buildings, waste separation bins to be provided in refuse chamber on each floor and / or a convenient centralized location to implement waste separation accessible to all building residents.
