BEFORE COVID-19

Bacteria, Fungal & Mould in HVAC Systems

includes **virus, bacteria, fungal, mould** and internally generated spores

Spores intercepted, germinated in moisture and produce **new spores**

AFTER COVID-19

“

**During this pandemic,
most are in the shut off
mode and many perceive
that there is no point of
doing anything, as we do
not know when this is
going to be over!**

”

“ The real challenge today is to develop an effective solution that is safe and eco-friendly at the same time. ”

POST PANDEMIC

Quality Research Enhancing Human Health

*We Care For Your Health Asset
& The Environment*

**“ AN OUNCE OF PREVENTION IS
BETTER THAN A POUND OF CURE,
BECAUSE I’D RATHER BE SAFE THEN
SORRY ”**

about the
COVID-19

**Increasing air circulation is believed
to be effective in reducing such risks.**

TESTED & VERIFIED BY VIROXY

The product was tested according to EN14476 Standard to evaluate its virucidal activity. It was found that the product is capable of eradicating 99.99% non-enveloped virus within 15 minutes. Therefore, the product can be declared as fully virucidal, meaning that it is effective against both non-enveloped and enveloped virus, including Coronaviruses, effectively minimizing the risk of infection.
