## ABOUT US

REHDA Institute is a not for profit charitable foundation which acts as the training and research arm of REHDA Malaysia to address the needs of the housing and property industry.

REHDA Institute objectives and activities focuses on the 3 main pillars of:

- **Training & Events:** Providing industry relevant training and events for the real estate and property development industry with the aim to improve productivity, innovate new ideas towards achieving the highest standards of professionalism and advance best practices for the industry.
- **Research:** Spearhead industry relevant research to drive improvements on industry's best practices, research contents for members' consumption and contribute positively to the overall development of Malaysia. This will be achieved through the production of industry relevant research papers, compilation and analysis of research data, publications and analysis of current issues.
- **Education:** Working hand in hand with tertiary institutions, REHDA Institute aspires to work on Executive Programmes for middle and senior management of the industry to groom future leaders of the industry. These Executive Programmes will be industry relevant to improve the value and skill set of those involved in the industry.

**GreenRe is the green real estate certification body established and owned by the REAL ESTATE HOUSING DEVELOPERS ASSOCIATION MALAYSIA (REHDA). Our core objectives are to provide an objective and international standard rating system to certify real estate projects as environmentally sustainable and to promote green buildings and sustainable development in Malaysia.**

We have adopted internationally recognised best practices as well as incorporated Malaysian standards in formulating our green building and township rating tools for the Malaysian built environment. Collaboration with the Malaysia's Ministry of Environment, Science, Technology, Environment and Climate Change (MESTECC) puts us in alignment with the Malaysian government's strategy for enhancing environmental sustainability and achieving CO2 emissions reduction targets agreed upon with the global community.
